27B/4 New Rohtak Road,
Karol Bagh, New Delhi 110005

Important: This brochure is information only, not a substitute for consultation. Suitability for a penile implant is decided by a qualified urologist after examination. Rigicon® devices are CE-marked and available in selected markets outside the United States; Infla10® is an investigational device in the USA. Prices are indicative, inclusive of device, surgery and standard stay, and are confirmed in writing before admission.

Rigicon®
Innovative Urological Solutions

NEW DELHI
INDIA

Two ways to a firmer tomorrow.

The **Rigi10™** malleable and **Infla10® Pulse™** inflatable penile implants — placed by the surgeon who brought Rigicon to India.

PENILE IMPLANT SURGEON

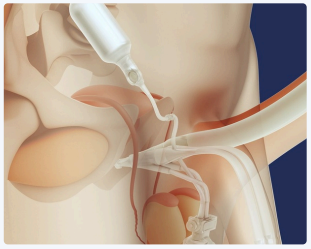

START HERE

Two families of implant.

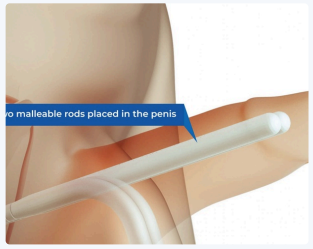

Inflatable and malleable. Both work on structure — not blood flow.

Tablets work on blood flow. An implant works on **structure** — which is why it keeps working after medication stops. There are two families: **inflatable** systems fill and empty on demand, **malleable** rods are positioned by hand.

1. **Cylinders — both types**
   Two cylinders sit inside the penis and give it rigidity. Inflatable cylinders fill with fluid; malleable rods hold their shape on their own.
2. **Pump — inflatable only**
   A pump in the scrotum moves fluid in and out. Malleable rods have no pump: they are simply bent into position.
3. **Reservoir — inflatable only**
   Holds the fluid, sited in the pelvis. A malleable implant is just the two rods — no fluid, no reservoir.

INFLATABLE

MALLEABLE

DEVICE	WHAT DEFINES IT
Infla10® Pulse™ INFLATABLE · PAGE 5	Girth to 46 mm AX: +25 % length
Rigi10™ MALLEABLE · PAGE 6	135° bend 9–14 mm rods

INFLATABLE · THE NATURAL CYCLE

Infla10® Pulse™

Three variants — X, AX and Narrow Body — so the fit follows your anatomy, not the other way round.

INFLATE & DEFLATE ON DEMAND

- **Proprietary 4th layer** — reinforces the cylinder against erosion
- **HydroShield™ coating** — hydrophilic surface on device and rear tips
- **Pulse™ pump** — higher flow rate, effortless deflation button
- **AdaptiveReservoir™** — shapes itself to the space, with a lock valve

46 mm
GIRTH EXPANSION

+25 %
LENGTH, PULSE AX

SURGERY PACKAGE · NEW DELHI

₹8,50,000
INDIA

$10,500
INTERNATIONAL

ALSO AMS 700™ and Boston Scientific Tactra™ are available here.

MALLEABLE · NOTHING TO PUMP

Rigi10™

A semi-rigid rod you position by hand. No reservoir, no fluid, no mechanism to fail.

FLEXIBLE ROD TECHNOLOGY™

- **Up to 135° bend** — a discreet, concealed resting position
- **Six diameters** — 9, 10, 11, 12, 13 and 14 mm
- **Stainless-steel core** — bending memory with no spring-back
- **Soft-to-touch distal tip** — conical on 9 & 10 mm, round on 11–13 mm

135°
MAXIMUM BEND

14 mm
MAXIMUM DIAMETER
